Project Delivery File: Weekly Planner

📃 Overview:

This document summarizes the completed work for the Weekly Planner project. The project was developed in three key phases, covering layout structure, task management components, and responsive design for mobile usability.

✅ Page 1: Basic Layout and Day Sections

- **Task Title:** Create Layout and Day Sections for Weekly Planner

📋 Tasks Completed:

Created a clear HTML structure with individual sections for each day of the week (Monday to Sunday).

Applied a **light cyan background (#F0FFFF)** for the overall planner layout.

Styled day headers using **blue color (#1E90FF)** for prominence.

Set day titles in **Arial Bold, 18px** for readability.

Left space below each day section for adding tasks and notes.

📦 Deliverables:

HTML layout file with day sections.

CSS file for background, headers, and typography styles.

✅ Page 2: Task List and Add Task Button

- **Task Title:** Implement Task List and Add Task Button

📋 Tasks Completed:

Added a task list section under each day.

Styled task text in **dark gray (#696969)** for good legibility.

Included an interactive **"Add Task"** button under each task section.

Ensured clean spacing and visual clarity within each section.

📦 Deliverables:

Updated HTML with task items and "Add Task" buttons.

CSS styling for task sections and buttons. •

✅ **Page 3: Responsive Design and Mobile Optimization**

🔹 **Task Title:** Make Weekly Planner Fully Responsive

📋 **Tasks Completed:**

Applied **media queries** to ensure responsiveness on smaller screens. •

Converted layout to a **vertical stack on mobile devices** for better readability. •

Ensured buttons and task sections are easy to tap and interact with on mobile. •

Tested and refined layout to ensure a smooth experience on both phones and tablets. •

📦 **Deliverables:**

Responsive HTML & CSS implementation. •

Screenshots showing planner usability on mobile and tablet devices. •

📎 **Project Files:**

index.html – Full layout structure. •

styles.css – Complete design and responsiveness styles. •

screenshots/ – Demonstrations of mobile responsiveness (optional to attach if •
needed).
